SUMMARY

Results-driven Frontend Engineer with 2+ years of experience building modern web interfaces using React.js, Next.js, and TypeScript. Proven ability to translate complex UI/UX designs into responsive, pixel-perfect code. Strong proficiency in state management, API integration, and performance optimization. Dedicated to writing clean, maintainable code and implementing best practices in UI architecture and accessibility within Agile environments.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Web Frameworks: React, Next.js (SSR/SSG), Vue.js
Design & Animation: Tailwind CSS, Shadcn UI, Chakra UI, Framer Motion, Material-UI, Figma
Performance Optimization: Debugging, UI responsiveness improvements
State Management: React Hooks, Zustand, Context API
Tools & DevOps: Git, GitHub, Vercel (CI/CD Pipelines), Supabase, Vite

WORK EXPERIENCE

Frontend Developer Intern
ArchSaint Nexus
Jan 2026 – April 2026
Nigeria **(**Remote)

- Translating high-fidelity UI/UX designs into responsive, interactive user interfaces using **React.js** and **Tailwind CSS**
- Collaborating directly with the Head of Operations and design teams to ensure technical feasibility of UI concepts
- Optimizing frontend performance, aiming for faster load times and improved user retention across web platforms
- Implementing reusable code libraries to streamline development workflows and ensure design consistency.

Frontend Engineer Intern
Ascent TechHub Africa
July 2025 – Dec 2025
Nigeria **(**Remote)

- Operating in an Agile environment with weekly sprints and stand-ups, contributing to real-world deliverables
- Collaborating with cross-functional teams to integrate **RESTful APIs** and manage state effectively using React Hooks
- Implementing modular components and reusable code libraries to streamline development workflows
- Participating in code reviews and debugging sessions to maintain high software quality standards and reduce production errors.

PROJECTS

Edible Mart Link

- Engineered a full-stack booking platform using Next.js (App Router), TypeScript, and Supabase, replacing a manual WhatsApp-based system with a dedicated Admin Dashboard and a real-time customer-facing app.
- Implemented complex business logic, including a 'debt wall' to block checkout for unpaid orders, smart stock management, and secure user authentication with Row-Level Security (RLS).
- Developed a complete user journey with persistent cart state via Zustand, branded email notifications using Resend, and client-side PDF report generation, all deployed automatically through a Vercel CI/CD pipeline.

Maglo Link

- Built a comprehensive financial tracking SPA (Single Page Application) for small businesses using Next.js and TypeScript.
- Implemented automated VAT calculation and a real-time data visualization dashboard to display revenue metrics.
- Structured the application with strict type safety to minimize runtime errors and improve code maintainability.

BrightHat Link

- Developed a high-performance educational platform connecting students with tutors using Next.js (SSR) for SEO optimization.
- Engineered a responsive, accessible user interface with Tailwind CSS, ensuring consistent behavior across mobile and desktop.
- Optimized Core Web Vitals and implemented Server-Side Rendering, reducing First Contentful Paint (FCP) by 40%.

EDUCATION

Bachelor of Science (B.Sc.), Physics. Federal University of Agriculture, Abeokuta (FUNAAB) 2019 — 2024
Lagos, Nigeria
